

# My StoryBook Album

Your images in our albums

The perfect match

**Please read carefully the following to assist you when choose the images for your album:**

Choose around 50 images for the 30 page album.  
Choose around 65 images for the 40 page album.  
Choose around 75 images for the 50 page album.  
Choose around 90 images for the 60 page album.

Please use the image order list to make a note of your chosen image numbers. Please list the images in the order you would like them to flow through the album. Here you can indicate if you would like the image in Black & White or Sepia (colour is the default unless the image is already B/W or Sepia). Also indicate any images you prefer large (across a single or double page also bearing in mind the orientation of the image in respect to the chosen album layout). You can also indicate if you would like a particular image to form a faded background such as a room shot etc. You may also choose an image for the cover.

We also offer an image adjustment service e.g. you may want a special photo in B&W with confetti or flowers in colour or similar.

When choosing your images please take care to make sure that they are in sharp focus.

If I have any queries relating to any chosen images I will contact you.

The size of the image is very important and images from phone cameras or cheaper compact digital cameras will not increase in size without pixilation. The best images to use are ones directly from the camera without any manipulation and as large as possible. Images taken by a professional photographer or quality digital SLR should pose no problems at all.

Images can be supplied in the following formats jpgs, tifs, psd or raw. If in doubt please call.

Once you have all your images you can choose to send them to us via ftp from our website or alternatively you can put the images on disc & send them directly to us.

All albums are supplied with a choice of 3 different types of paper as standard:

- 1) Photographic (recommended)
- 2) Textured canvas effect
- 3) Smooth (only recommended for albums up to 20X30)

We also offer a High Gloss Metal paper as an option at £2 per page.

If you are planning on sending photographs for scanning then I suggest you send original images preferably gloss (lustre will be o.k. but not as sharp as gloss) and send the images by recorded delivery or courier (insurance if required).

Once I have designed the album you will be able to view the layout online. Please be aware that I allow a maximum of five image layout changes (should you require them) throughout the album and there is a charge of £15 per page for any changes over and above this. If you give me all the information on the sheet then it is very rare to have to make any changes.

From agreement of layout it normally takes approx 4 – 6 weeks for the album to be produced in Italy. N.B that from November we cannot guarantee delivery before Christmas due to Graphistudio workload as this is their busiest time.

Please call us at any time to discuss anything you are unsure about.
